ABOUT US

At GeriatRx, we specialize in personalized deprescribing services aimed at optimizing medication regimens for patients. Our team, led by Dr. DeLon Canterbury, a Board-Certified Geriatric Pharmacist, offers comprehensive consultations, precision medicine analysis, and ongoing support to address medication-related concerns. We focus on safety, efficacy, and patient well-being, and utilize advanced techniques such as pharmacogenomics testing to tailor treatments, reduce side effects, and improve overall health outcomes.

OUR SERVICES

Medication Check-Up

We conduct a virtual consultation to assess medication concerns and potential harm, offering personalized advice with a Board-Certified Geriatric Pharmacist.

Deprescribing Initial Evaluation

We provide a comprehensive review of medications to identify opportunities for deprescribing, including a personalized action plan for improving quality of life.

Precision Medicine Evaluation

We utilize genetic testing to personalize medication therapies, reducing side effects and healthcare costs with tailored recommendations.

Drug Cost-Saving Analysis

We identify cost-saving opportunities for medications, including clinical trial enrollment and prescription assistance programs, to alleviate financial burdens

Deprescribing 6-Month Retainer

We provide continuous access to concierge deprescribing services, ensuring ongoing support and medication optimization.

At GeriatRx, we're committed to empowering patients on their journey towards better health and enhanced quality of life.
